

Individual assignment #3 – SQL
INFO 6540 – Data Management Winter 2022
5% of final grade

Task

Your task is to **write SQL queries to retrieve data from the gummybox_sales database.**

1. Write an SQL query that retrieves the name, description, consistency, colour, and flavour of all the gummies offered by GummyBox.
2. Write a query that retrieves the name of and description of gummy boxes, and the name and quantity of the gummies included in the box.
3. Write a query that retrieves the first name, last name, email and all fields of the preferred address (except the id) of all customers.

For task 3 and 4, use only individual gummy orders, and ignore gummy boxes.

4. Write an SQL query that retrieves the first name, last name, and total number of **individual** gummies purchased by each customer ordered from the customer with the highest number of purchased gummies to the lowest number of purchased gummies.
5. Write a query that retrieves the total revenues generated by the sale of **individual** gummies for GummyBox since 1995 (inclusively).
