

Individual assignment #3 – SQL
INFO 6540 – Data Management Winter 2022
5% of final grade

Task

Your task is to **write SQL queries to retrieve data from the gummybox_sales database.**

1. Write an SQL query that retrieves the name, description, consistency, colour, and flavour of all the gummies offered by GummBox.
2. Write a query that retrieves the name of and description of gummy boxes, and the name and quantity of the gummies included in the box.
3. Write a query that retrieves the first name, last name, email and all fields of the preferred address (except the id) of all customers.
4. Write an SQL query that retrieves the first name, last name, and total number of gummies purchased by each customer ordered from the customer with the highest number of purchased gummies to the lowest number of purchased gummies.
5. Write a query that retrieves the total revenues of GummyBox since 1995 (inclusively).
